

KyMed

Built for Surgical Precision

www.kymed.co

Who We Are?

KyMed is a Pakistan-based manufacturer of **surgical and dental instruments**, supplying **OEM brands, private-label programs, and healthcare distributors worldwide**.

Manufacturing operations are based in Sialkot, Pakistan — a globally recognized center for surgical instrument production. **KyMed** manages the complete manufacturing cycle in-house, including **forging, machining, finishing, inspection, and packaging**. All production is governed by an **ISO 13485-compliant quality management system**, ensuring consistent quality, full traceability, and regulatory alignment for international markets.

As an export-focused manufacturer, **KyMed** is structured to meet the expectations of global partners seeking dependable supply, transparent documentation, and long-term manufacturing relationships.

Industry-Led Foundation

KyMed was founded by an **award-recognized** industry operator with proven experience in scaling surgical exports and holding leadership roles within the sector. This background defines **KyMed's** operational discipline, quality systems, and long-term orientation, ensuring sustainable partnerships rather than short-term supply transactions.

PRODUCT SCOPE

GENERAL SURGERY INSTRUMENTS

Precision Instruments for Everyday Surgery

Usage Areas – General Surgical Instruments

- **Hospitals:** Operating theatres and emergency units
- **Clinics & Surgical Centers:** Outpatient and day-care procedures
- **Laboratories & Research:** Specimen handling and minor applications
- **Veterinary & Field Use:** Veterinary and emergency medical settings

- **Grasping & Holding Instruments:** Dental forceps, needle holders
- **Restorative Instruments:** Scalers, curettes, excavators
- **Surgical & Extraction Instruments:** Elevators, luxators, retractors

PRODUCT SCOPE

Single-use and reusable Instruments

KyMed offer **high-quality single-use instruments in kit-grade** and **premium options** for cost-effective and precision procedures, along with **durable stainless-steel reusable instruments** designed for repeated sterilization and long-lasting performance in hospitals and surgical centers

Kit-Grade Single-Use Instruments:

- Designed for routine procedures with cost-efficiency in mind.
- Pre-packaged kits for convenience and sterility assurance.
- Ideal for clinics, outpatient centers, and minor surgical procedures.

Premium Single-Use Instruments:

- High-precision instruments for critical procedures.
- Manufactured with superior materials for optimal performance.
- Suitable for hospitals, specialized surgical units, and high-risk environments.

Reusable Instruments

• Stainless-Steel Reusable Instruments:

- Made from surgical-grade stainless steel for durability and long life.
- Can withstand repeated sterilization without corrosion or performance loss.
- Suitable for hospitals, teaching institutions, and high-volume surgical facilities.
- Available in a wide range of general, dental, and electrosurgical instrument types.

Why Choose Us?

OEM & Private-Label Manufacturing

KyMed supports **OEM and private-label** manufacturing programs under defined customer specifications and controlled production protocols. Our systems are designed to ensure consistency across batches, protection of brand identity, and dependable long-term supply.

OEM and private-label partners benefit from:

- Dedicated production alignment
- Specification-controlled manufacturing
- Repeat-order consistency

Quality & Compliance

- In-process and final inspections
- Batch-level traceability
- Export documentation support

Customization Capabilities

- Customer-defined grades and materials
- Surface finishes and polishing levels
- Laser marking and private branding
- Packaging and labeling customization
- Market-specific compliance support

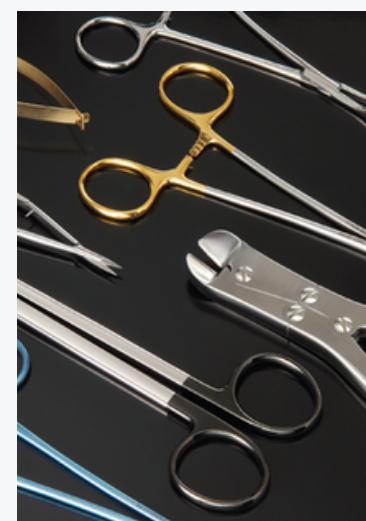

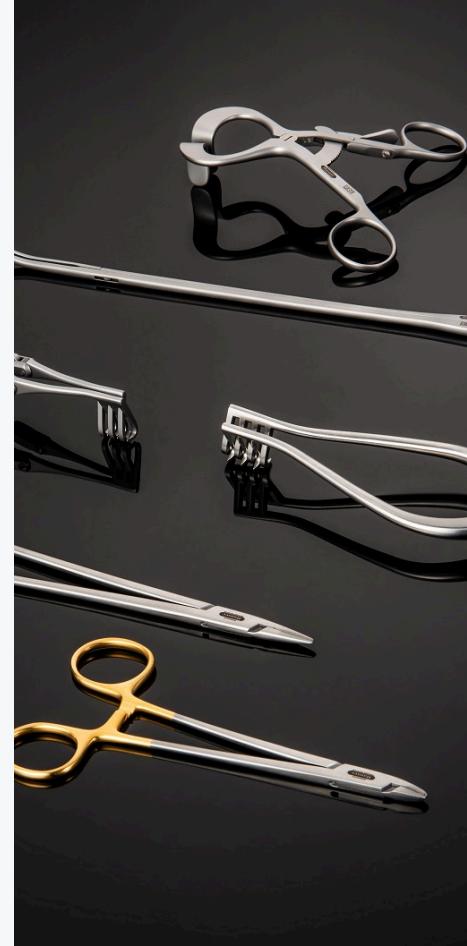

Global Operations

- Pakistan
- United Kingdom
- United States

Planned expansion into Dubai by 2027 will further strengthen **KyMed's global distribution** support and regional accessibility.

KyMed

KyMed delivers high-quality surgical instruments designed for precision, reliability, and superior performance. Trusted by healthcare professionals worldwide for safe and efficient procedures
